CONNECT

Managers are tasked with finding between 10-30% cost savings each year.

Monitor and Eliminate Mobile Downtime and see your ROI in weeks.

Is your company paying for mobile workers to wait for mobile computers to respond, while IT helpdesk and software costs skyrocket?

What you need is visibility into where, when and why mobile downtime is occurring. Arm yourself with a tool to quickly find and fix problems while reducing the costs to own and manage the mobile infrastructure supporting critical business operations.
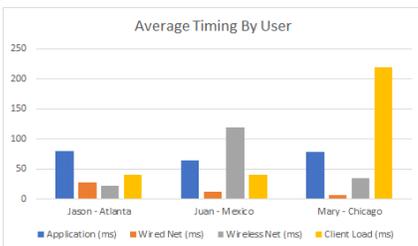

Add over **$10,000,000** to the bottom line right now by resolving mobile downtime.

Gaining back **seconds** from workflows will achieve cost and time savings.

Average Timing By User

Application (ms) ■ Wired Net (ms) ■ Wireless Net (ms) ■ Client Load (ms)
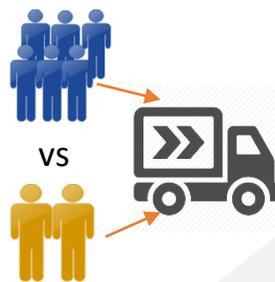

Reduce Costs, Today

Mobile workers in Distribution Centers, Retail and Delivery will tolerate multi-second delays on their mobile computers without complaining. But, those seconds add-up to $3000 - $10,000 additional labor costs per mobile worker. Benchmark, improve and reduce labor costs with CONNECT.

Increase Throughput Yield

With CONNECT optimizing each mobile transaction you shave seconds off all barcode scans and product movement, which means you can move more product with less labor and overhead, and prove it with mobile transaction data.

Lower Cost of Owning Mobile Infrastructure

Streamlining the mobile infrastructure by eliminating unnecessary software and support costs reduces your costs to maintain mobile devices, networks, and applications. With CONNECT you can increase ROI on infrastructure investments.

Fix Mobile Issues, Now

With CONNECTs diagnostic tools and mobile transaction visibility IT teams can quickly identify and fix any issue causing mobile downtime in less time. That's a feather in the IT cap, and measurable improvement in mobile downtime.

Performance by Shift by Component
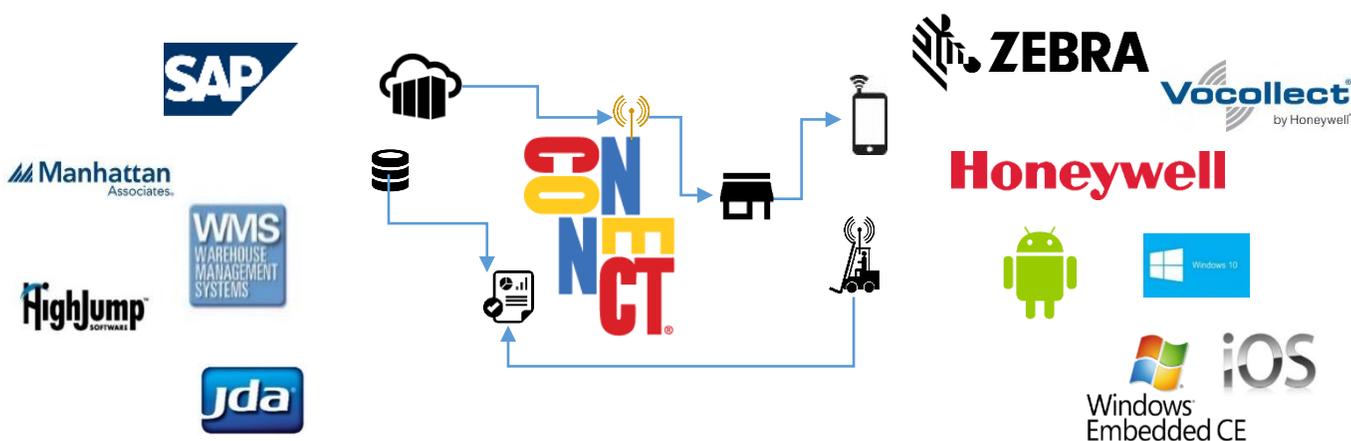

Client Load (ms)

Simpler

✓ Universal connectivity eliminates the cost to deploy, manage, and support third-party device software.

Why CONNECT?

Smarter

✓ Wireless system diagnostics, analytics and monitoring keep data-collections operations running optimally with less staff and software.

Faster

✓ Proprietary optimization features measurably speed response times on industrial mobile devices reducing labor and IT costs to move goods and deliver products.

CONNECT's software is virtual, centralized and agnostic to your mobile applications, networks, devices, and operating systems.

Trusted by Fortune 500 companies across major industries.

"Connect's troubleshooting tools have saved us billions over the years."
