

CloudMax Quick Start Sheet

System requirements: 1GB RAM, 1GB free disk space, hypervisor

- Step 1** Download the CloudMax VM from the **Resources** tab at <http://www.connectrf.com>
- Step 2** Using the hypervisor, power-up the VM. The startup screen displays the CloudMax URL
- Step 3** Browse to the CloudMax URL and login using the default username **crf** and password **crf123**
- Step 4** Click on the **CloudMax** tab to bring up the CloudMax administrative page
- Step 5** Click on the **Setup** tab, then the **Web Wizard** tab.

- Step 6** Enter the full network address and home page of the application and press **ENTER**

Wizard Step 1 of 3	
This wizard connects browsers to web applications. Use the Setup Wizard to make changes to this and all other connection types.	
Enter the full network address and home page of the web application. The following examples demonstrate acceptable formats	
https://datacenter.com:5000/application.html https://192.0.0.45/application.html https://cmax:5480/c2demo/c2demo.html	
Address	<input type="text" value="https://"/>

- Step 7** If necessary, enter any DNS name that has been assigned to CloudMax and press **ENTER**

Wizard Step 2 of 3	
The address of this CloudMax instance is https://10.0.0.50 . If a DNS name has been assigned or if it has a public IP address that differs, enter that address below	
Address	<input type="text" value="https://10.0.0.50"/>

- Step 8** Enter a preferred connection name, if desired, and press **ENTER**

Wizard Step 3 of 3	
CloudMax automatically assigned a unique name for this connection. If you would like to use a more descriptive name, enter it below	
Connection Name	<input type="text" value="con2218"/>

- Finish** Browse to the indicated URL for a CloudMax connection to the host application

Wizard Complete	
The new connection has been activated. Enter the URL in the browser to start a CloudMax session with the host application	
Connection Name	con2218
URL for Browser	https://10.0.0.50:2218
