

Managed Cloud-Hosting

Connect offers fully managed cloud-hosting services to all CloudMax users, helping them maximize the value of their mobility investments.

The Cloud Advantage

- *Cost-Effective:* No capital expenditures on equipment and no IT costs associated with integration or maintenance
- *Fault Resilient:* Redundant, server/client architecture minimizes downtime
- *Disaster Recovery:* Continuous, image-based system back-ups minimize the losses from a catastrophic hardware failure
- *Proactive Monitoring:* Increases uptime by detecting and resolving problems before they disrupt the network.
- *Easy Implementation:* The deliverable is an IP address

The cloud infrastructure and servers meet the same Tier 3 ANSI standards for redundancy and uptime as Google's (estimated 1.6 hours downtime/year). Users are provided with a highly secure, encrypted VPN connection.

This service is provided for a fixed monthly fee based on the resources required for optimal performance. Those resources are determined by a non-intrusive, free system test.
