

## Voice for ClientMax

Powered by Nuance, voice for ClientMax provides its users with the industry's leading engine for automatic speech recognition (ASR) and text-to-speech (TTS) functions. This ClientMax add-on is compatible with all host-types and applications, and is speaker independent.

### Value

- *High Return on Investment:* ASR and TTS enabled mobile devices can increase user productivity by up to 20 percent
- *Low Impact:* Quickly and easily integrates into the application and does not disturb the mobile architecture
- *Adaptable:* Recognizes the voice commands of any speaker and can also be trained\* for individual speakers

- *Manageable:* Centralized PC tools provide “no touch” management of device configurations, user profiles and more
- *Multi-lingual:* The embedded Nuance speech engine provides users with the option for many languages\*\*
- *Support:* As with all Connect products experienced and responsive support staff are always available

\*Speaker training is only available on the upgraded version of this product

\*\*English, Spanish and French standard, others available
